📍 Dhaka, Bangladesh

Professional Summary

Software Engineer with **4+ years of experience** in **Backend, AI/LLM application development**, and hands-on exposure to **IoT, Embedded Systems, and Drone Technology**. Specializing in **Python, GoLang, and JavaScript** with strong expertise in **microservices architecture, database optimization, and scalable application development**. Currently building LLM-powered EHS (Environment, Health & Safety) and QMS (Quality Management System) inspection platforms, with hands-on experience in **Docker, Kubernetes, and CI/CD pipelines**. Possesses practical experience working with **microcontrollers, sensors, communication protocols, embedded firmware development, IoT-based automation solutions, and drone systems**. Personally practices **fine-tuning LLMs for business use cases** and building **deployment pipelines**. Passionate about **Agentic AI, RAG, Generative AI, IoT Solutions, and Autonomous Systems**.

Skills

- **Programming Languages:** Python | GoLang | JavaScript | C | SQL
- **AI/LLM:** LLM Fine-tuning | RAG | Agentic AI | LangChain | LangGraph | MCP (Model Context Protocol) | Vector Databases (ChromaDB, Pinecone)
- **Backend Frameworks:** FastAPI | Django | Django REST | Go Gin
- **ML/DL:** Deep Learning | Computer Vision | TensorFlow | PyTorch
- **DevOps & Tools:** Docker | Kubernetes | CI/CD (GitHub Actions, GitLab CI) | Git | Jira
- **Databases:** PostgreSQL | MongoDB | Redis | ChromaDB
- **Soft Skills:** Effective communication, creative problem-solving, research-oriented thinking

Work Experience

Software Engineer (LLM & Backend), SDS Manager LTD – Dhaka, Bangladesh January 2026 – Present

- Developing LLM-powered EHS (Environment, Health & Safety) and QMS (Quality Management System) inspection platforms similar to SafetyCulture, iAudit, and Velocity-type applications.
- Integrated **Model Context Protocol (MCP)** for seamless LLM tool-calling and context management across microservices.
- Containerized applications using **Docker** and orchestrated with **Kubernetes**, implementing **CI/CD pipelines** for automated testing and deployment.
- **Tech:** Python, FastAPI, LLMs, MCP, Docker, Kubernetes, CI/CD, PostgreSQL

Software Engineer (Promoted from Associate), Brain Station-23 LTD – Dhaka, Bangladesh April 2022 – December 2025

- Engineered scalable microservices architecture for the Waadaa e-commerce platform, accelerating development speed by **30%**.
- Designed relational database schemas from business use cases to support a catalog of **10,000+ products**, ensuring high data integrity and consistency.
- Optimized query performance, reducing average response time from **690 ms to 2 ms** — a **99.7% improvement** that enhanced customer experience.
- Enhanced CI/CD pipelines to catch more bugs pre-deployment and reduce release friction.
- Improved TEQ (Ferdia) platform performance, boosting user engagement by **22%** and reducing client onboarding time by **30%**.
- Refactored database access layers, eliminating redundant queries and cutting backend load time by **40%**.
- Developed a Python-based automated testing framework in collaboration with QA, increasing test coverage by **50%**.
- **Languages:** Python, GoLang, JavaScript
- **Frameworks:** Django, FastAPI, Django Rest Framework, Gin (Go), ReactJS, jQuery

Full Stack Developer, Trillionbits Ltd – Dhaka, Bangladesh July 2021 – January 2022

- Delivered REST API features using ExpressJS and Django, increasing backend reliability and reducing system error rates by **20%**.
- Refactored monolithic legacy modules into reusable components, resolving N+1 query issues and improving backend performance by **35%**.

- **Frameworks:** Django, Django Rest Framework, ReactJS, jQuery

Education

Daffodil International University, Dhaka, Bangladesh, BSc in Computer Science & Engineering

Jan 2017 – Jan 2021

- CGPA: 3.71/4.0

Research & Personal Projects

LLM Fine-Tuning & Deployment Pipeline (Personal Practice)

Ongoing

- Practicing fine-tuning open-source LLMs (Llama, Mistral) on business-specific datasets for domain adaptation.
- Building end-to-end deployment pipelines using **Docker**, **Kubernetes**, and **CI/CD** for serving fine-tuned models via FastAPI.
- Experimenting with quantization (GPTQ, AWQ) and LoRA/QLoRA for efficient fine-tuning and inference.

AI Research Agent (Agentic AI & RAG)

- Designed an AI Research Agent to assist researchers in managing and exploring large collections of documents.
- Enabled storage of research documents in a vector database with embedding-based retrieval for precise context matching.
- Implemented a hybrid query pipeline where the system first searches embeddings for relevant content; if none is found, it falls back to direct LLM responses.

Restaurant Review Management (Agentic AI & RAG)

- Developed a restaurant review management system using Agentic AI and Retrieval-Augmented Generation (RAG) to provide intelligent insights and suggestions.
- Stored all restaurant reviews in a vector database and enabled querying through an AI agent to generate summarized overviews and recommendations.
- Integrated LangChain and LangGraph for knowledge graph construction, semantic search, and automated review analysis.

Teq - Cloud-Based Coach Company System

- Developed an advanced cloud-based system to automate and streamline daily operations of coach companies
- Improved operational efficiency, customer satisfaction, and profitability through automation
- Tools Used: Python | Go | Django | Django RestAPI

Waadaa - E-commerce Application

- Built a full-featured e-commerce platform to provide seamless shopping experiences for users
- Implemented product catalog, cart management, order processing, and payment integration
- Tools Used: Python | Django | Django RestAPI

Certifications

- **Deep Learning** — Kaggle — *ANN, SGD, Dropout, Batch, Binary Classification*
- **Intermediate Machine Learning** — Kaggle — *Model validation, Feature engineering, Random Forest, XGBoost, Data leakage handling*
- **Intro to Machine Learning** — Kaggle — *Supervised learning, Data Preprocessing, Decision trees, Overfitting, Model selection*
- **Cyber Security and Physical Protection at Workplace (Malware)** — Brain Station 23 — *Malware analysis, Cyber hygiene, Office system protection*
- **Python (Intermediate)** — HackerRank — *Data structures, Algorithms, Python functions, OOP, File I/O*

Languages

- **English** — Proficient (IELTS Band 6)
- **Bangla** — Native Speaker
